

A Word from Second Grade...

Each day, we set high expectations, provide numerous challenges, and enable students to continue unpacking their unique personalities. We acknowledge individual learning styles while helping students strengthen their assets and set goals where they need improvement. The result is confident and strong students who love learning and problem solving.

By modeling acceptance, compassion, and respect, we create a strong sense of community in Second Grade. Our social studies curriculum focuses on exploring ourselves, our place in the world, and how we got here. The Second Grade theme of "L'dor V'dor" guides us through an investigation of our family history. This focus on the connection between generations plays beautifully into the time we spend with senior citizens through our Tikkun Olam project.

By blending Judaism with meaningful academics, we create the environment in which an insightful, creative, and deep thinking group of children come alive.

WELCOME TO SECOND GRADE!
